# SYSTEM DIAGRAMS

## Use case Diagram

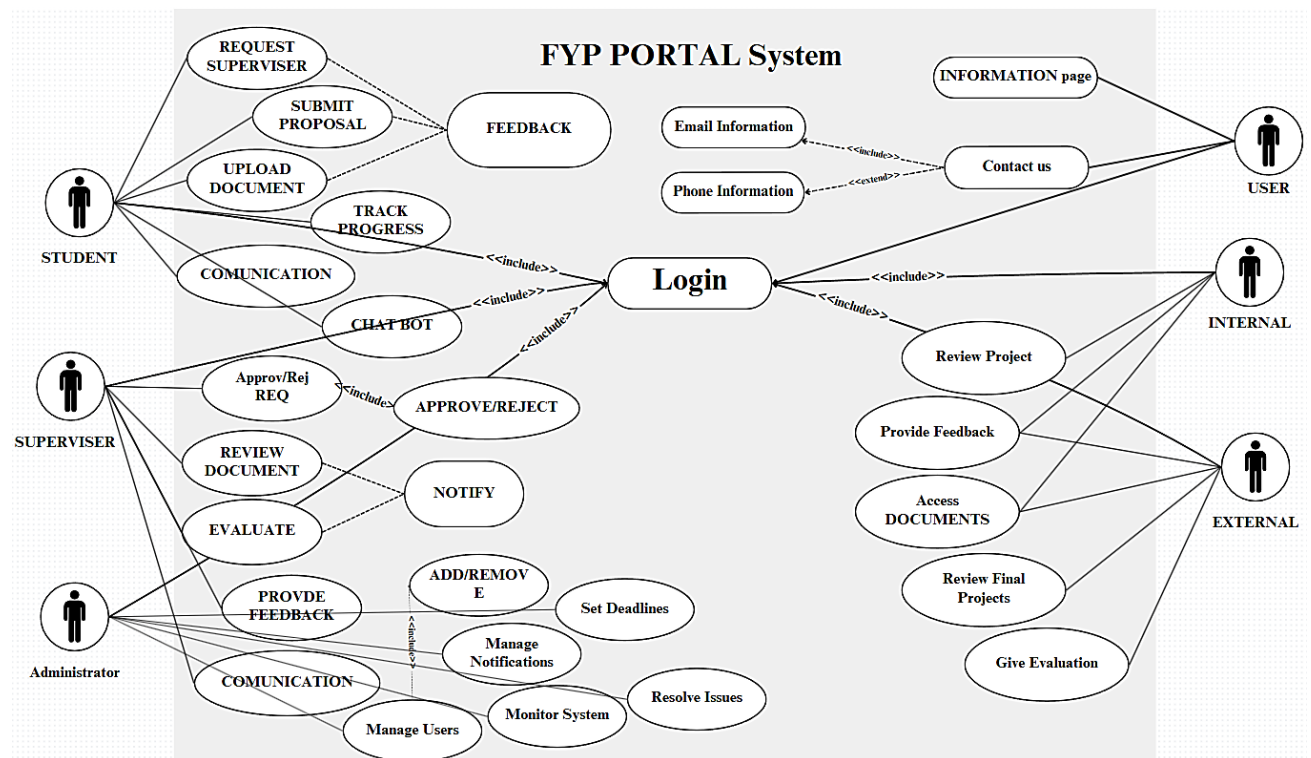

Figure 1: Use case diagram

The Use Case Diagram for the Final Year Project (FYP) Portal is a picture of how every user like students, supervisors, admin, and evaluators will interact with the system. Students are the main users; they will perform tasks like submitting project proposals, uploading documents, tracking their progress, and communicating with supervisors. Supervisors will review proposals, give feedback, approve documents, create meetings with students to guide them. Admins will ensure the system works properly, managing user accounts, sending crucial mails, setting deadlines for submissions, and fixing overall issues. Evaluators will access the project's documents, evaluate and provide feedback on them, and grade them at the end. The whole system starts after a simple login, showing options that make managing FYP's easier and efficient.

## Architectural Diagram

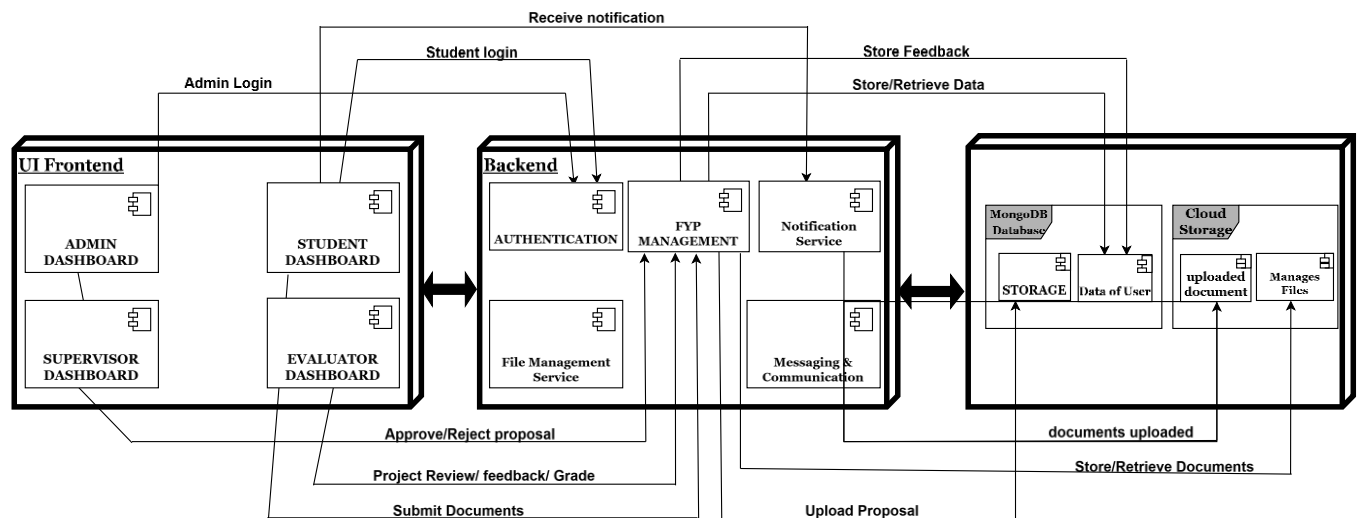

Figure 2: I-Architectural Diagram

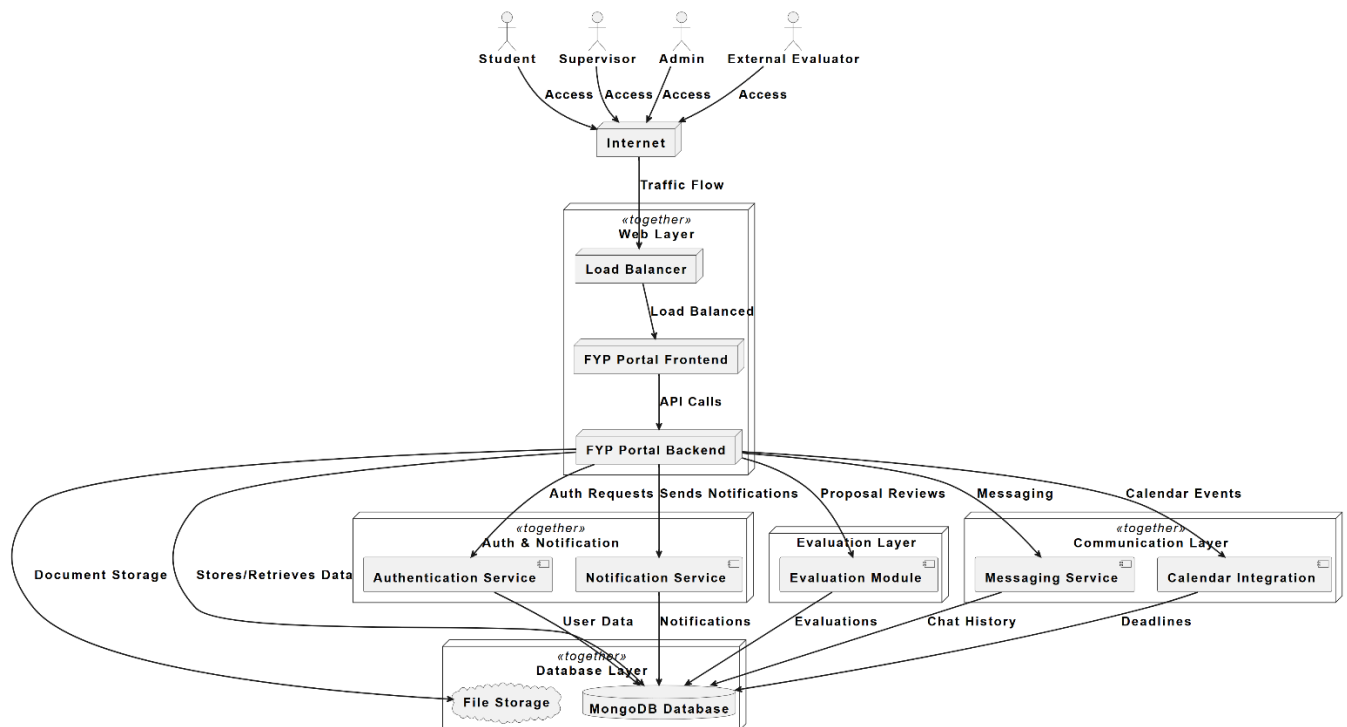

Figure 3:II-Architectural Diagram

The architectural diagram provides a clear understanding of Final year Project (FYP) management system, how it works, a clear view how main four users' students, supervisors, admin and evaluators interact with each other within system. Student, supervisor and admin will use the main FYP portal, whereas the evaluators will only access evaluation tab. This will help in smooth running of system; a load balancer distributes the user's traffic over the server. The web layer has frontend, which take care of user interaction, and the backend, it will work on logic, API requests, connection of important services. The backend also links with

authentication service for users' verification for accessing the portal, and notification services to share all new important messages. All data is stored in MongoDB database, whereas uploaded files are managed separately. The design shows the main features like document storage, reviews, messaging, feedback, calendar integration, map integration, and evaluation workflow, providing a complete scenario of how the system work in FYP management while making the experience smooth, efficient and scalable performance.

## Component's Diagram

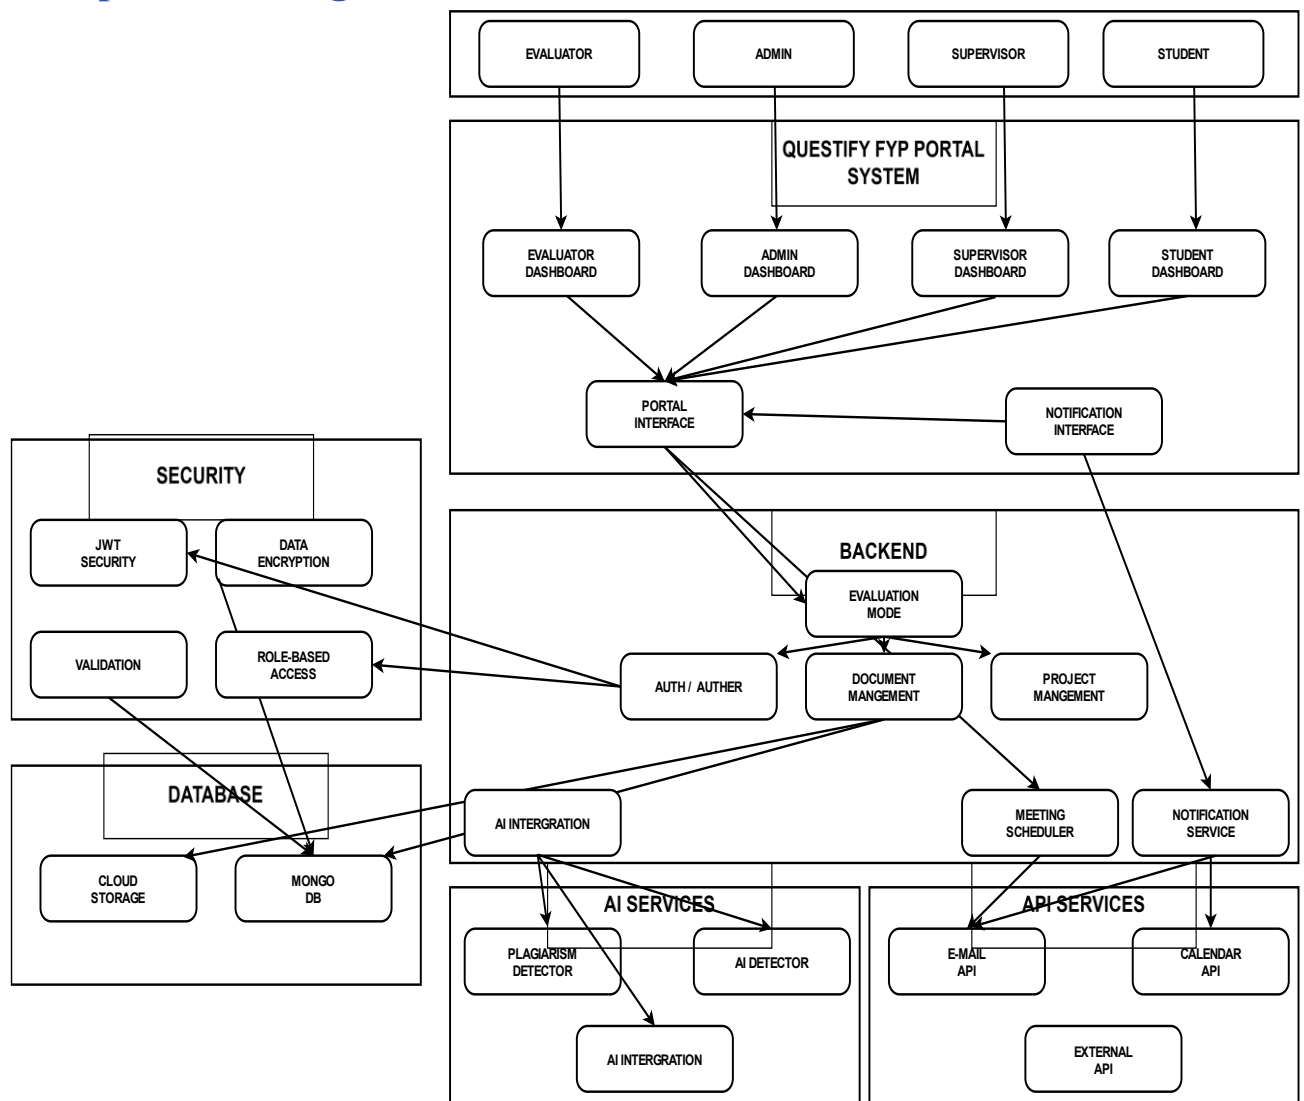

Figure 4: Components Diagram

The component diagram of Questify FYP portal shows the clear parts of the system that how it is structured, visualizing main components, how they connect and work together. All users have their personal dashboard according to their roles. All users connect with a portal interface, which manages user interaction, navigation and all frontend experience. Whereas in backend, the system have two parts like authentication and authorization, Document management,

project management, evaluation, meeting arrangement, and notification service, all work in backend to make a smooth and functional system. Security is core have feature, JWT authentication, data encryption, validation, and role-based access control. Data is stored and managed by MongoDB and cloud storage for documents. The system has AI services for plagiarism and AI detection, more services via API requests, including email API, calendar API and other third-party integrations. The diagram highlights the modules, secure and scalable nature of the Questify FYP portal.

Data Flow Diagram (DFD)

Workflow Diagram

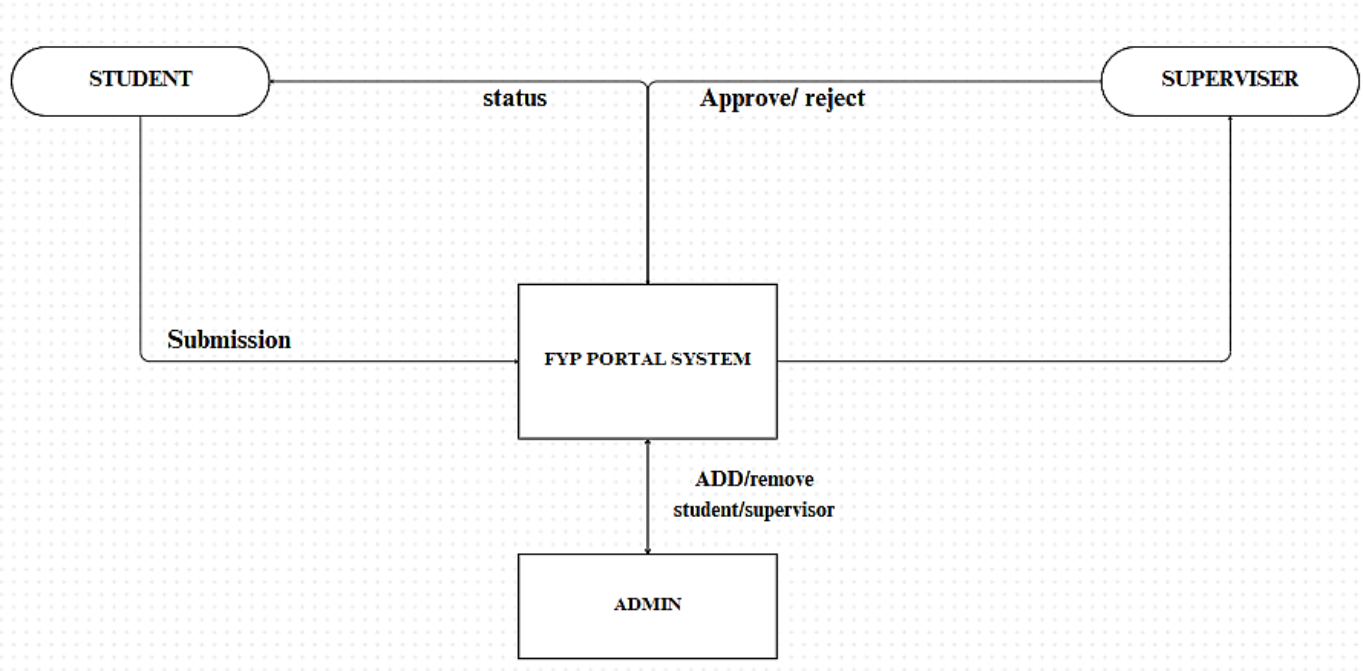

Figure 5:Level-0 DFD diagram

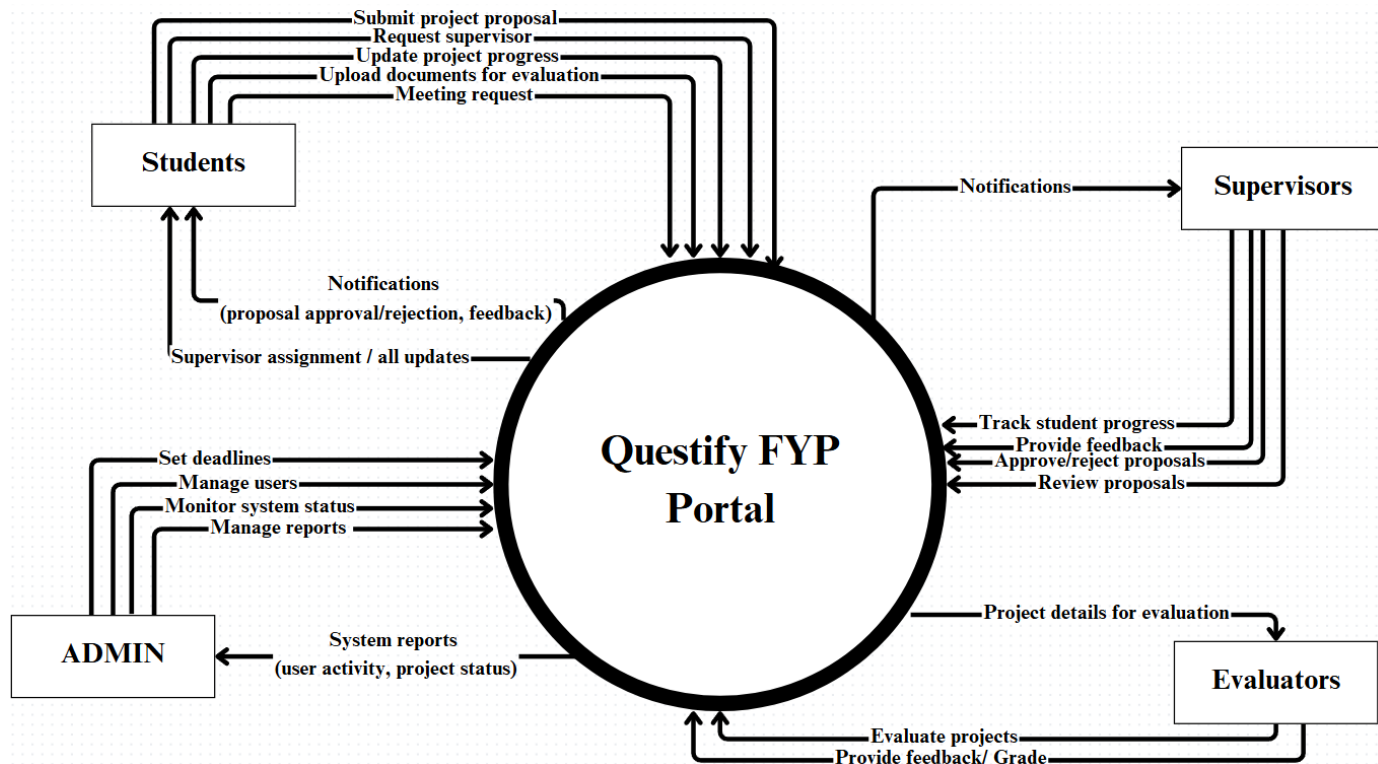

Figure 6: Level-1 DFD diagram

The Data flow diagram (DFD) show direct flow of data, how the data move with in system, how the users interact with it. Student start by submitting project proposal, requesting supervisor, tracking progress, uploading documents, meeting. Supervisor receive notifications for request, proposal review, then provide feedback, and either approve or reject. Admin manage overall system's things like user accounts, setting deadlines, assigning supervisor, check system. Evaluators have limited work they only come when evaluation needed reviewing submitted work, providing feedback on that work, assigning grade. The Questify FYP portal is central hub, make sure smooth flow between users. This DFD clear tells how the system's process connect, and how data is interchange between users and system.

## Class Diagram

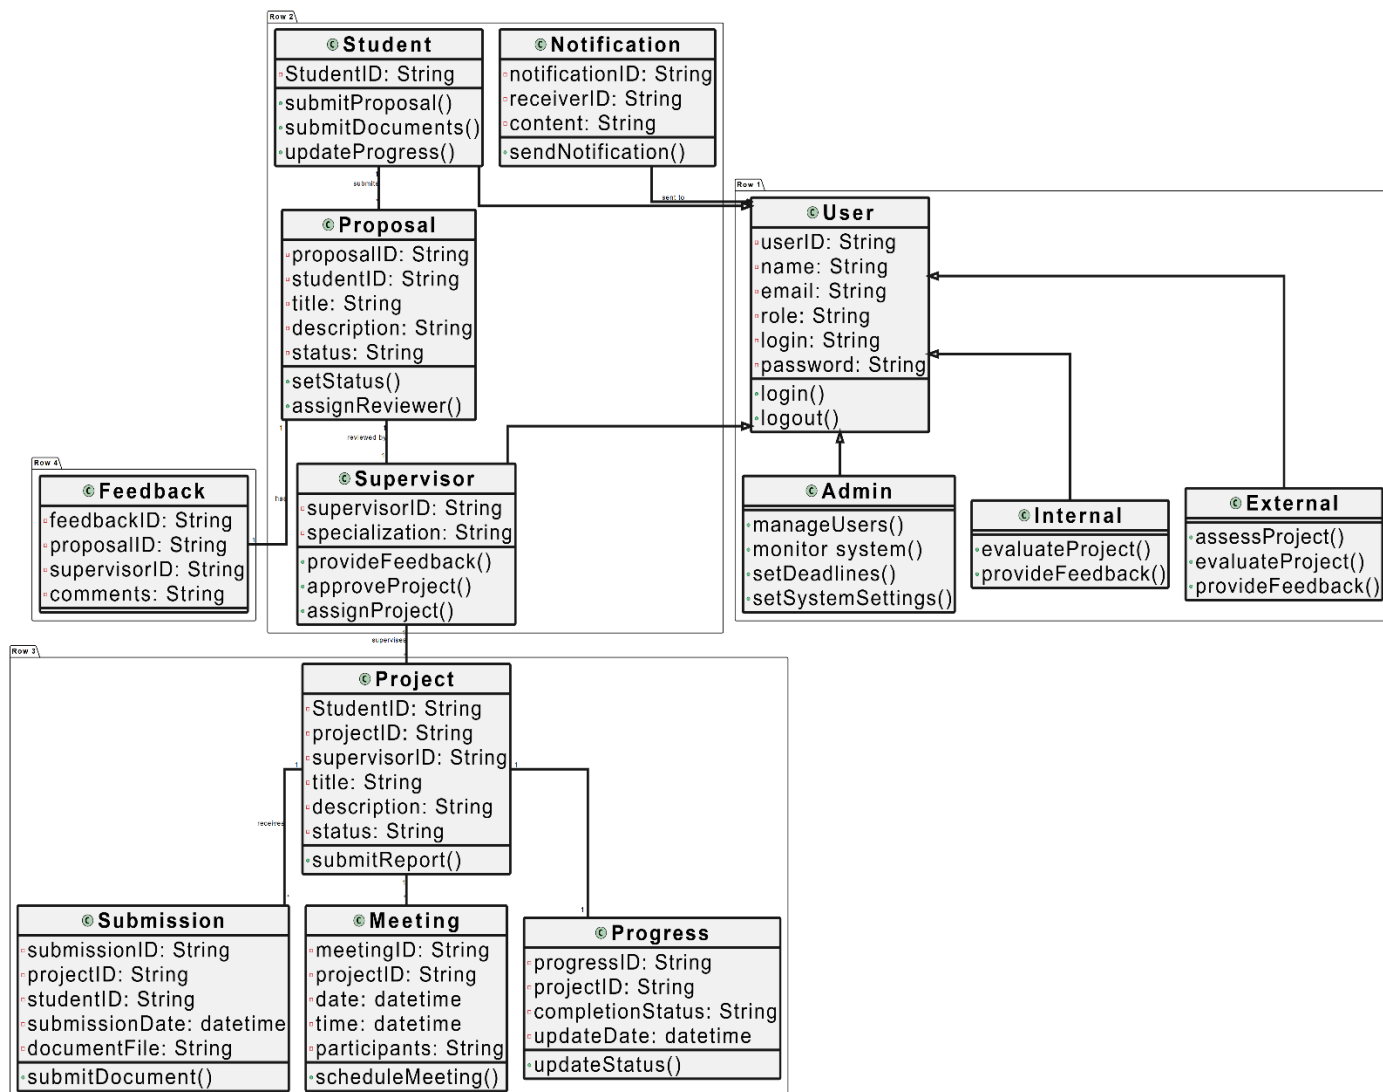

Figure 7: Class Diagram

The class diagram for Questify FYP portal shows how the system is built and how the FYP process works at Lahore Garrison University. It includes classes with key details such as user ID, name, email, role, and login credentials. From this start, specific roles such as students, supervisors, Admins, and evaluators each have their own functions. The diagram shows the classes' interaction of users with each other, highlighting overall how users connect in an organized way for managing FYP's efficiently.

## ER Diagram

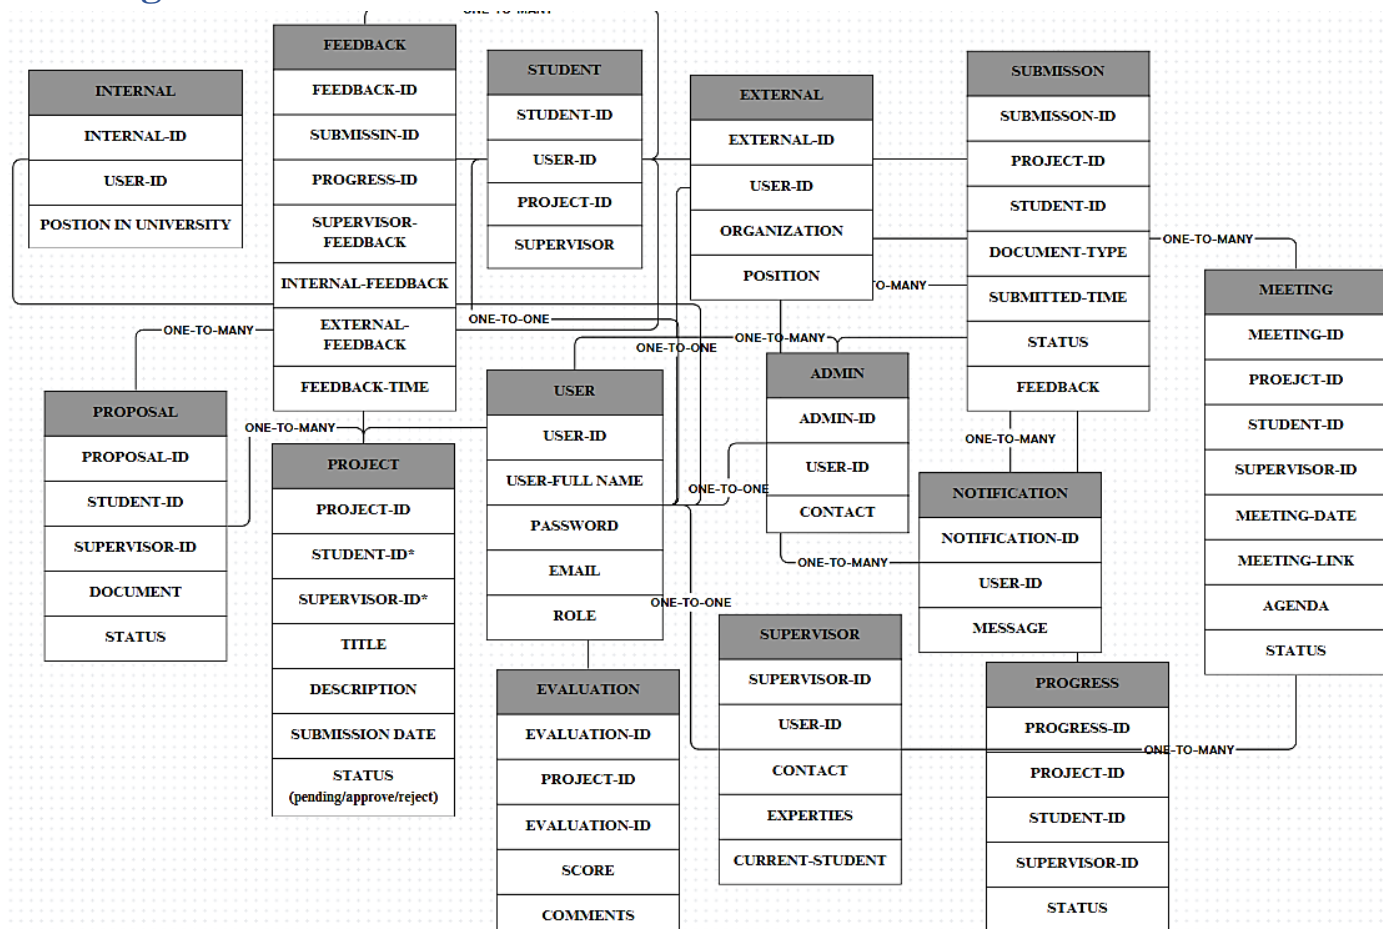

Figure 8:Entities relations Diagram

The structure of the Questify FYP portal telling how the entities of project interact with each other and what are the relation between users.

## Sequences Diagram

The image depicts various sequence diagrams for the Final Year Project (FYP) System, illustrating the interactions between different actors (Student, Supervisor, Admin, Internal, External) and the system itself.

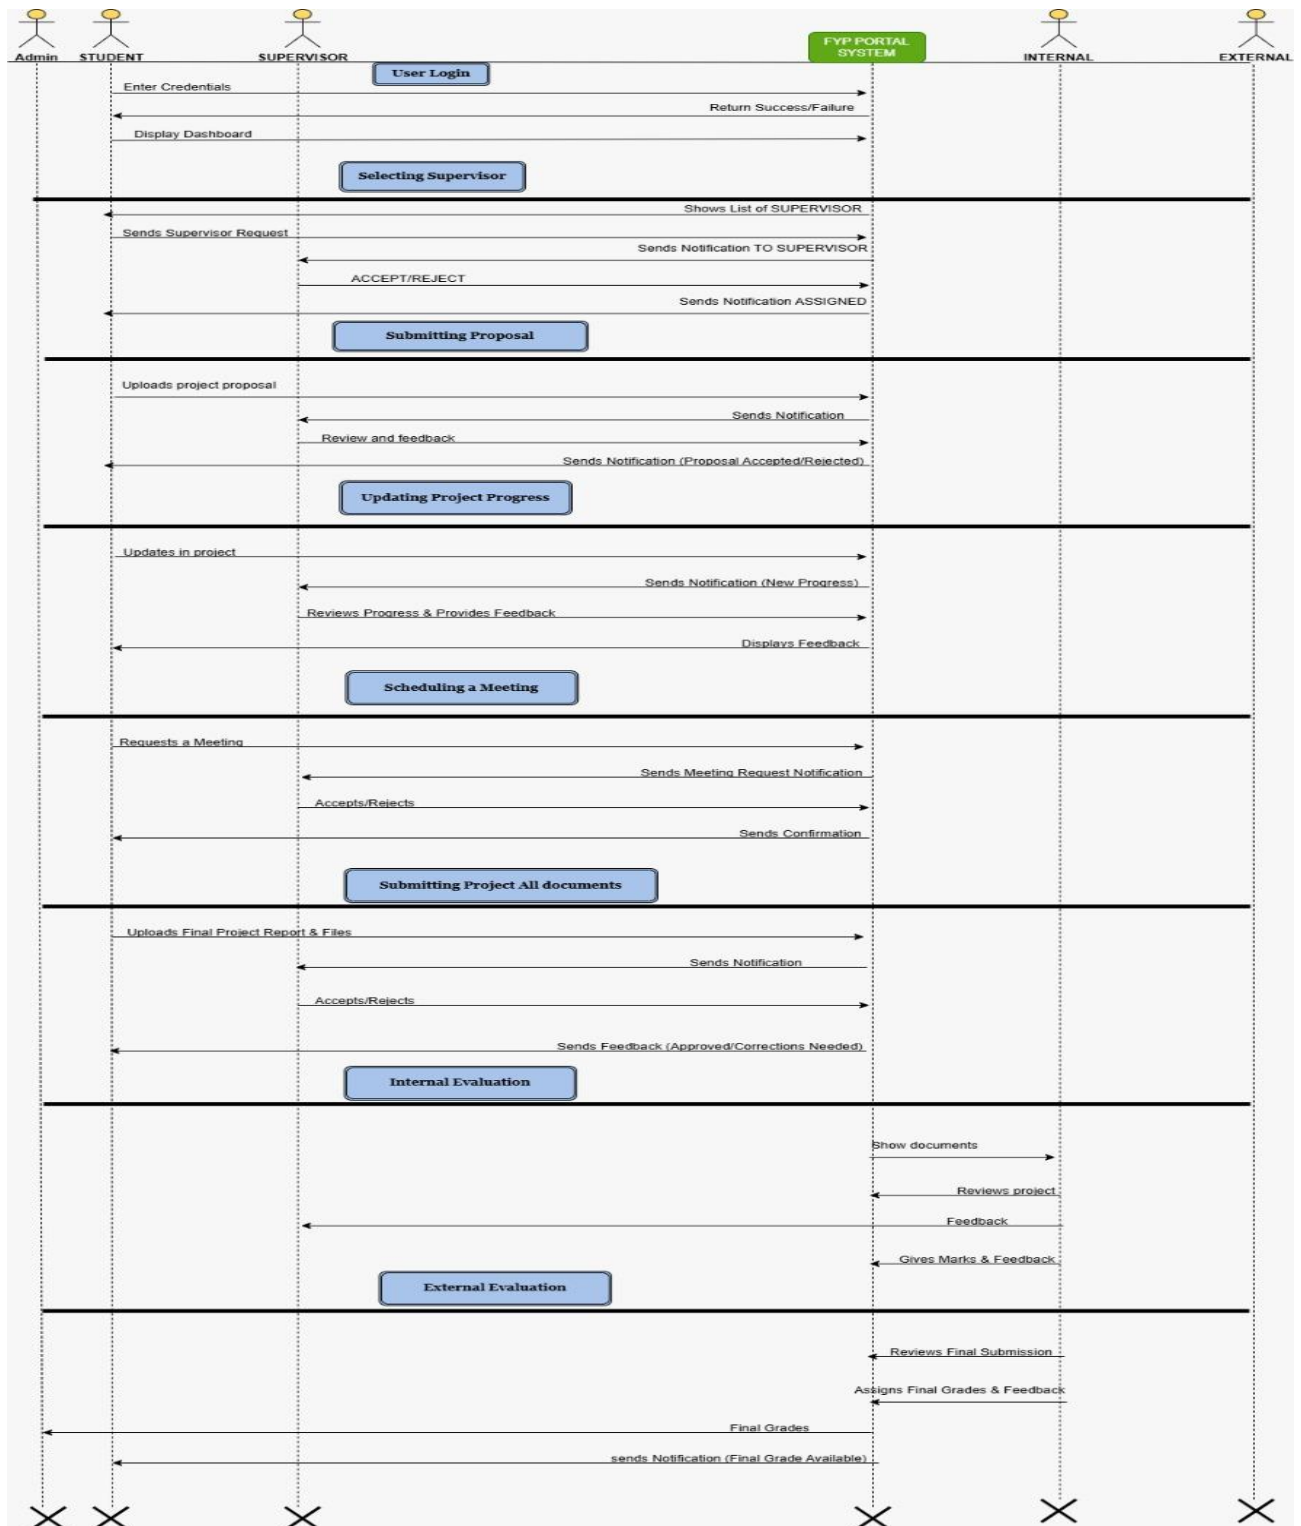

Figure 9: Sequence Diagram

The diagram shows the student journey throughout the Questify FYP portal, start with login that allow to access portal according to their role. As student first project proposal, then selecting supervisor, send request, when supervisor assigned, review proposal then approve or return with feedback, Further student progress and update project, constantly get feedback from supervisor. Creating meeting for communication, with request and confirmation handle directly. After document submission face the project enter in evaluation process, evaluator access final project and provide grades and feedback on project, that complete the FYP journey.

## Activity Diagram

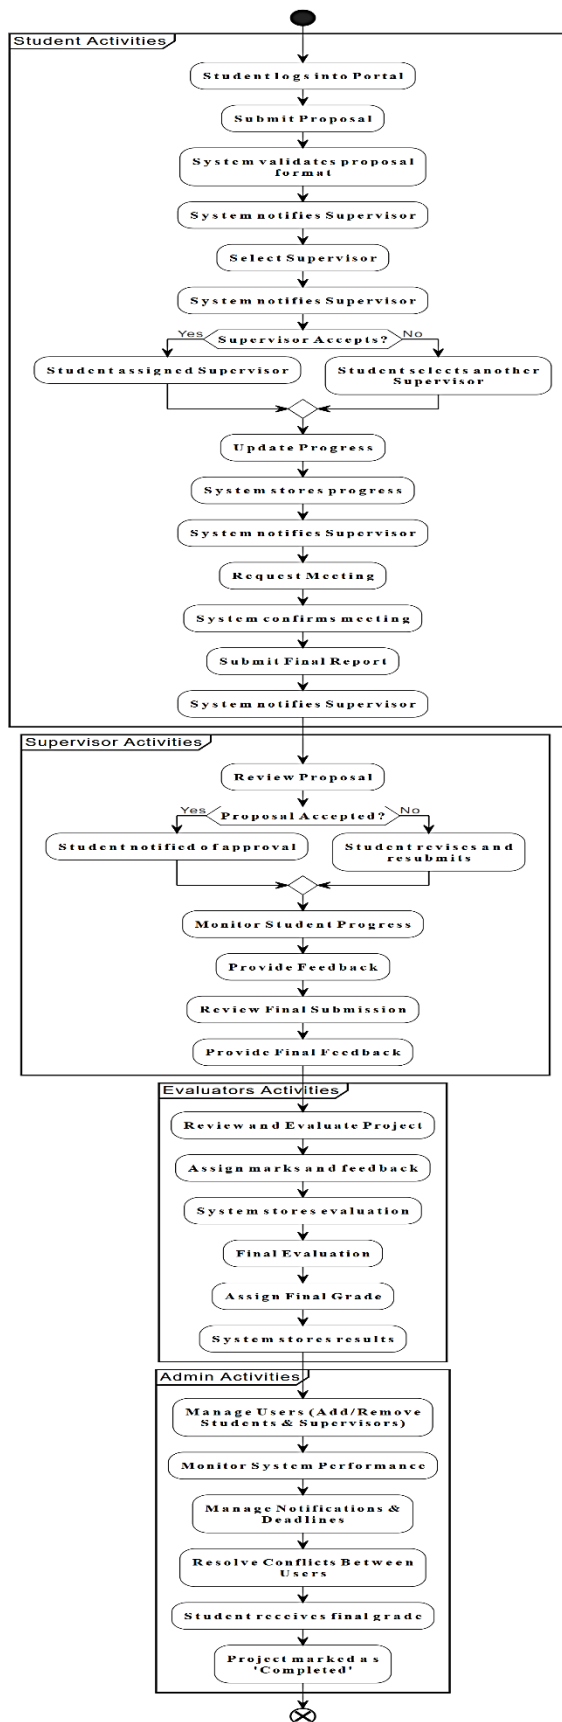

Figure 10:I-Activity Diagram

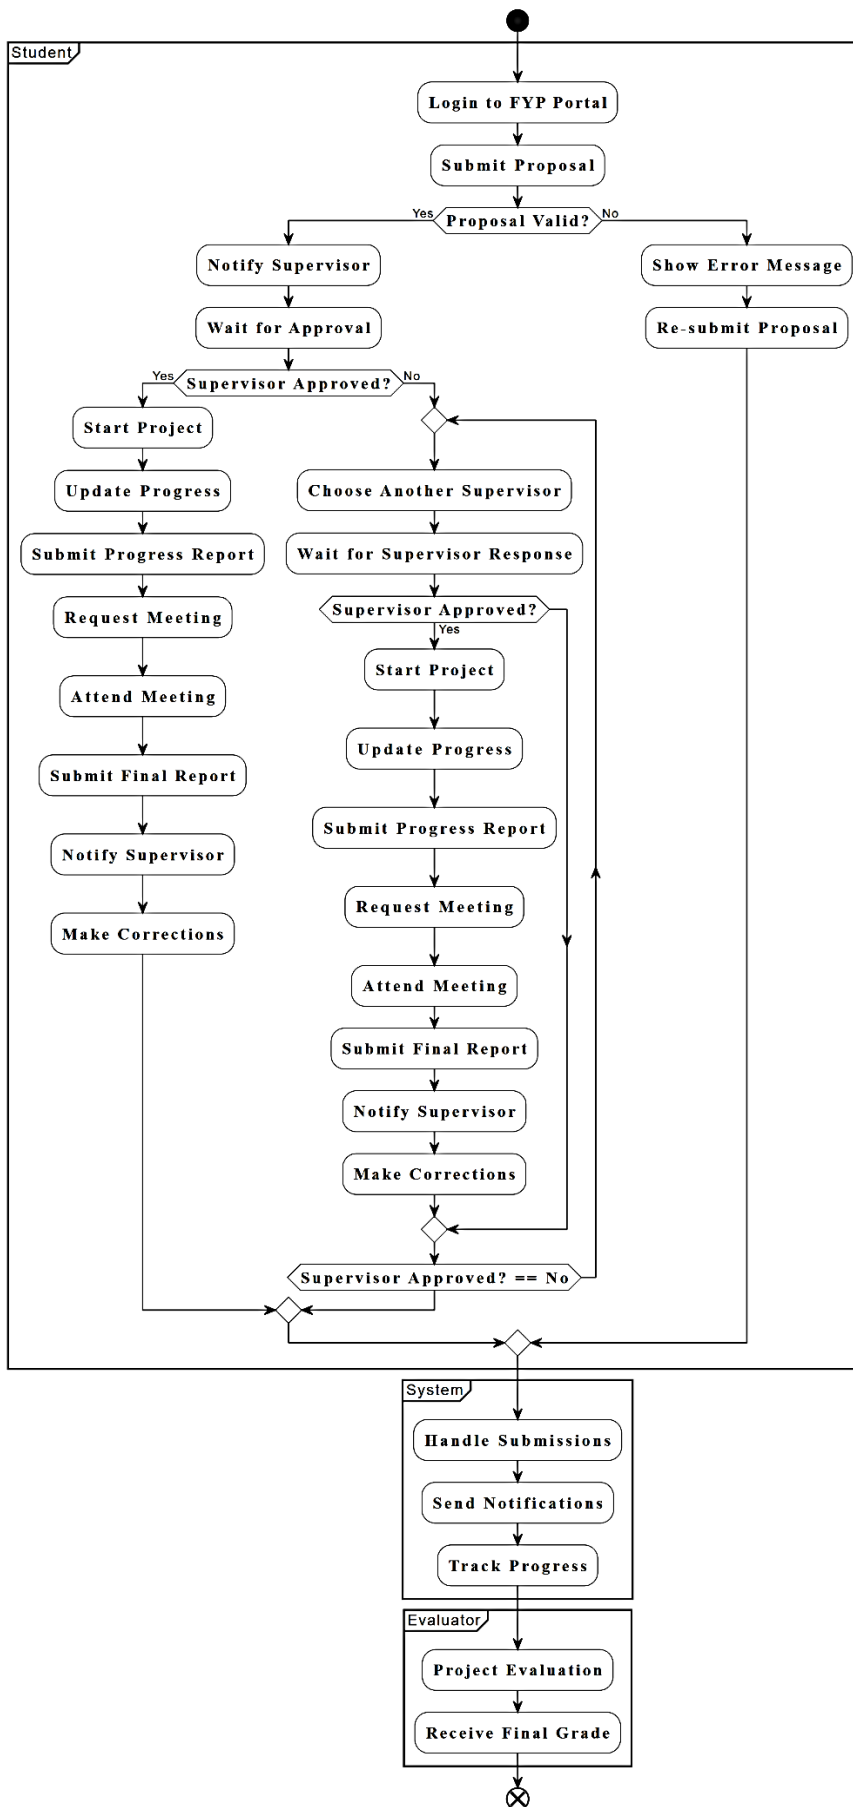

Figure 11:II-Activity Diagram

This activity diagram shows the interaction of all users with the Questify FYP portal system, starting from the simple login by the student, follow up by submitting proposal, system check validation, select supervisor, system notify supervisor about proposal, then accept or again for updating after feedback, update progress, system store every changing and progress in project, meeting requests, notifications, when almost near to completion of project, submit final report, get supervisor review, then evaluation, where evaluators access document and review project then provide feedback and grade them. At admin level he manage users, deadlines, notifications, and resolve conflicts and finally generate grade, and the system marks the project as completed

## State Diagram

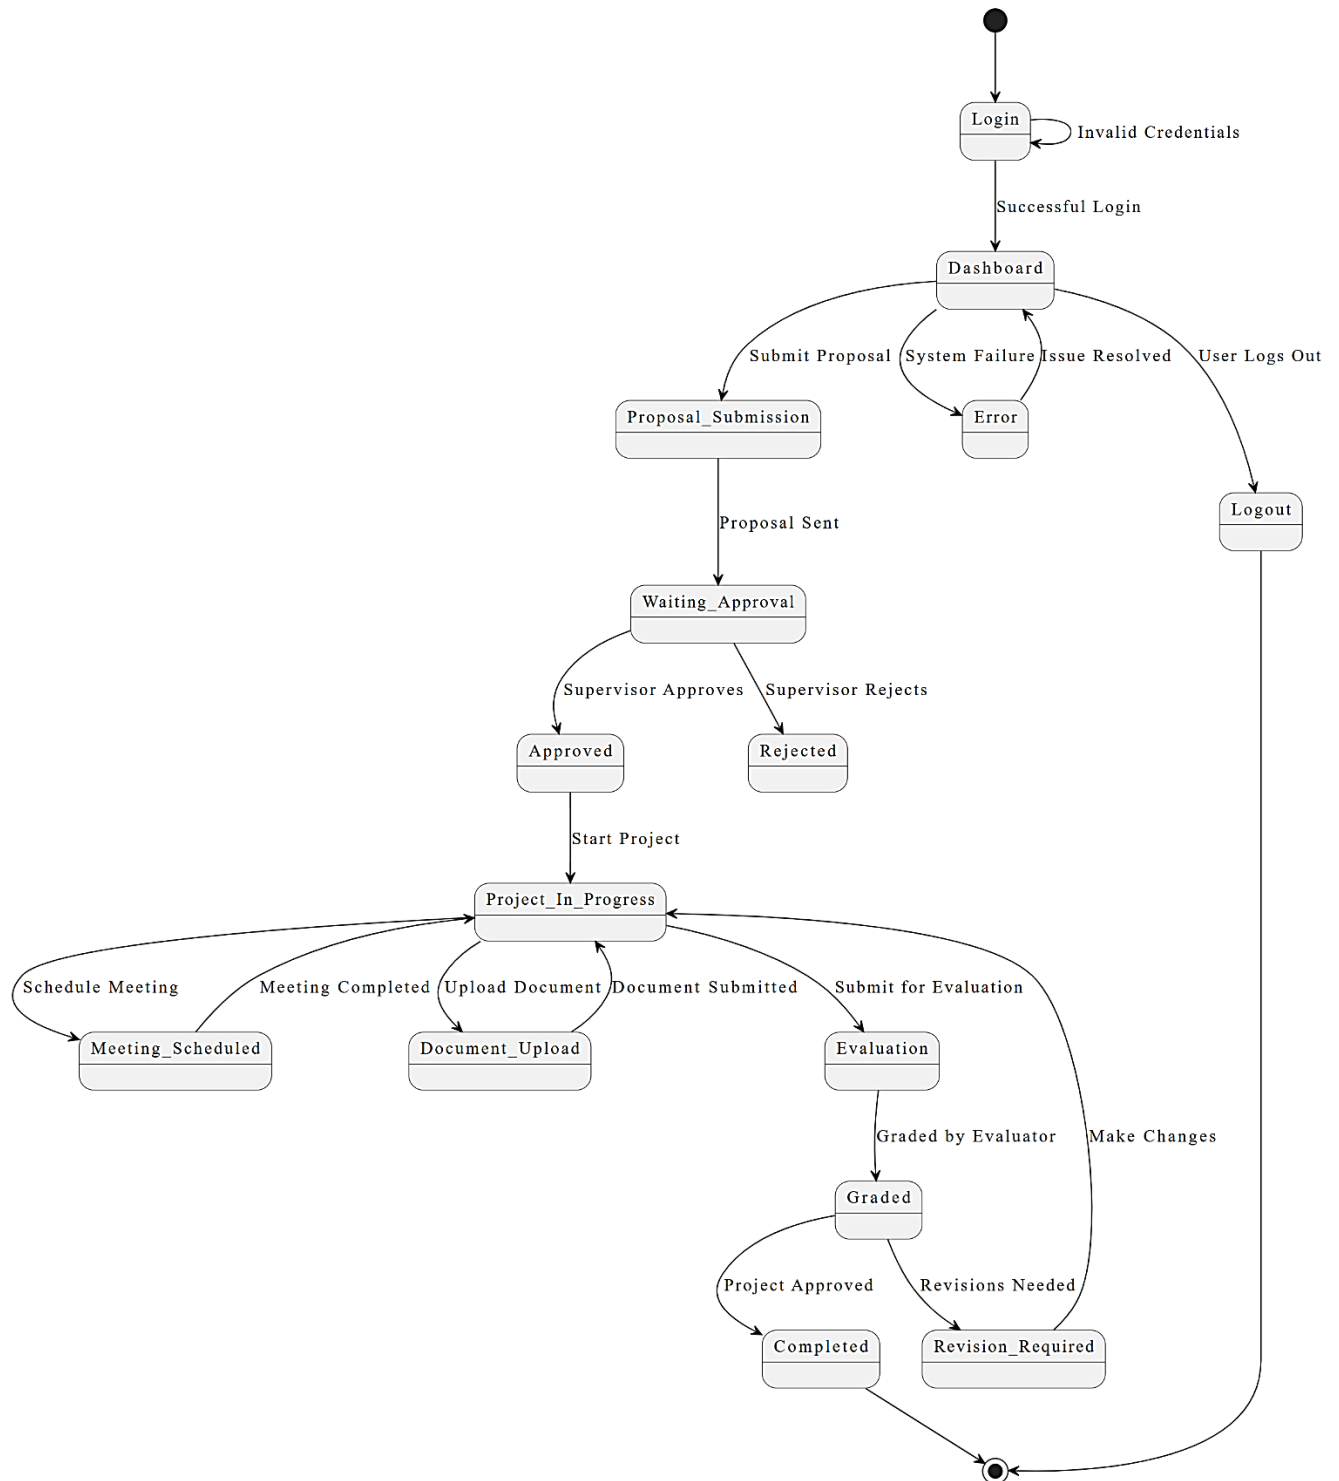

Figure 12: State Diagram

The state diagram of Questify FYP portal refers to the user interaction with system from login to project completion. Users login, submit proposal, and move one by one through states like

waiting for review, approval, feedback, project in progress and evaluation. Successful projects reach the completed state.

# PROTOTYPE

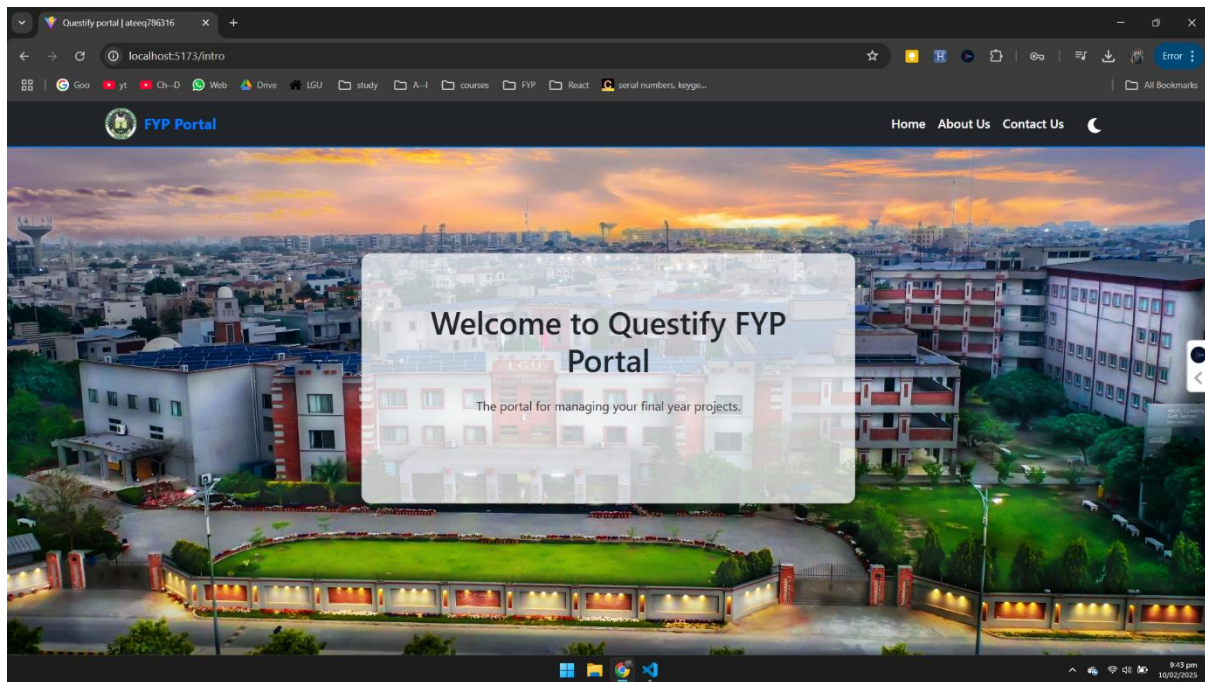

Figure 13:Landing page

## Description:

The Questify FYP Portal homepage is a simple, welcoming and starting page for managing final year projects. At the top, users are greeted with a friendly welcome. A clean navigation bar at the top, making it easy to go to important sections like Home, About Us, and Contact Us. The "FYP Portal" logo stands out prominently, easy to identify. This page guides users toward exploring the platform's project management features.

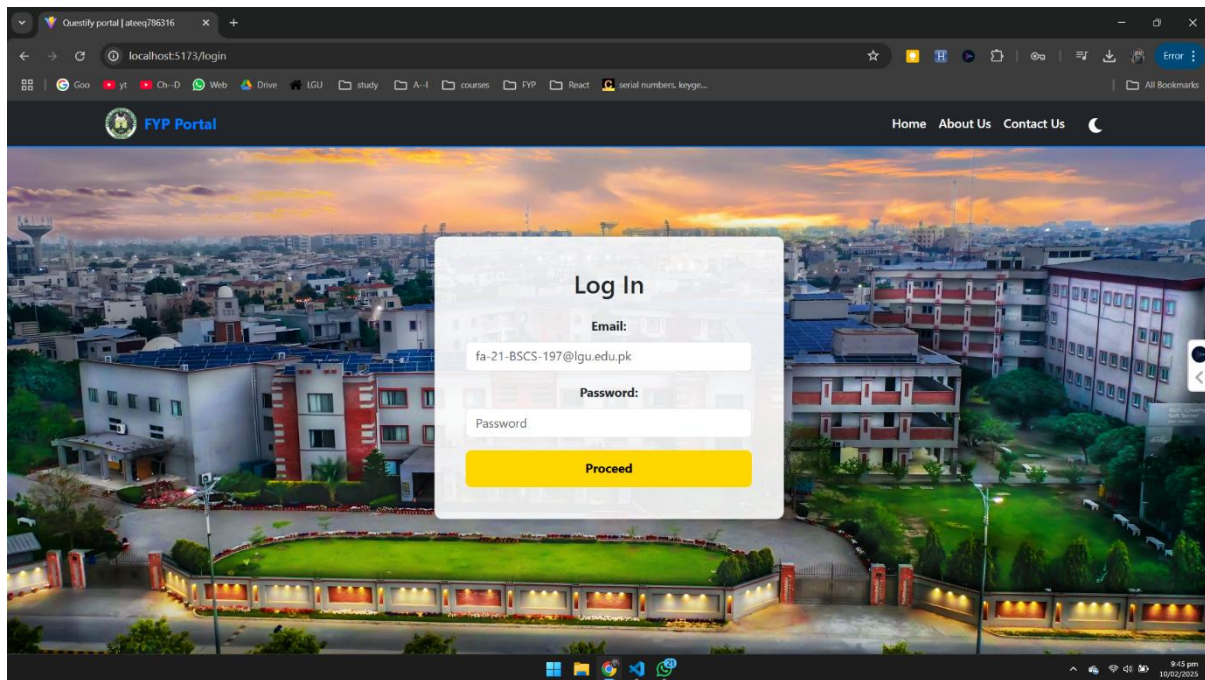

Figure 14: Overall login

### Description:

The above login interface gives let users login, secure access to the Questify FYP Portal. Users enter their given email address and password by the ERP portal, into the provided place. When the detail are filled in, clicking the "Proceed" button starts the login process, allowing them to access the platform and manage their final year projects.

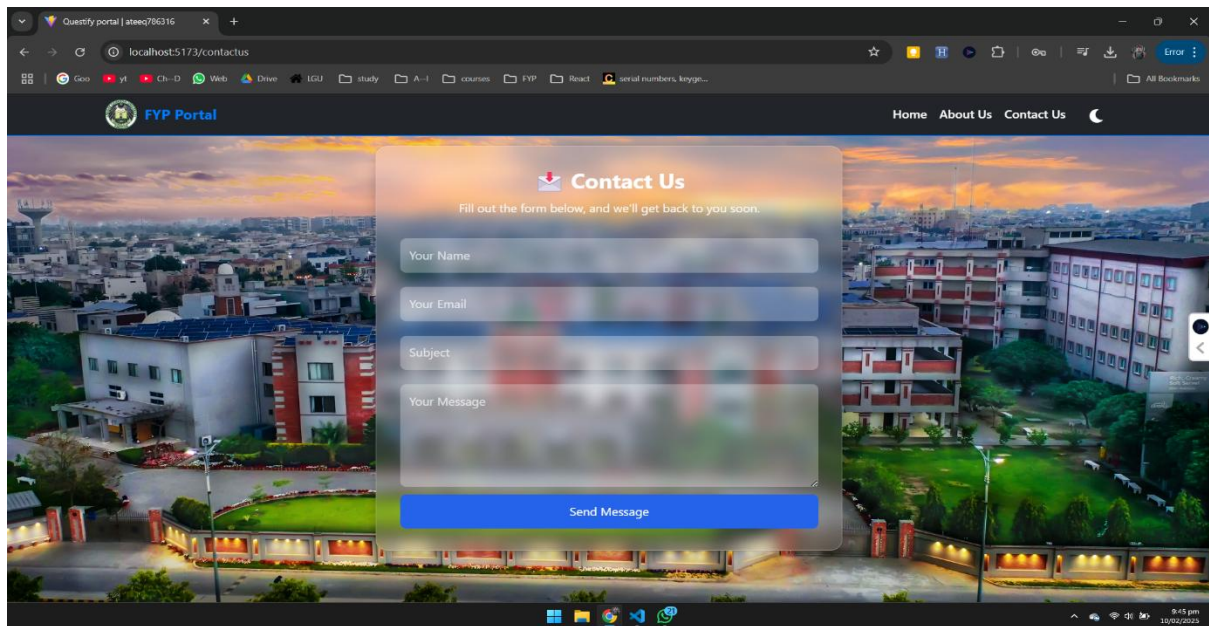

Figure 15:Contact us

**Description:**

The "Contact Us" page on the Questify FYP Portal offers is an easy way to get help or ask inquiries. By fillingup their form with their name, email address, subject, and message, users can directly communicate with the portal administrators. Once the details are entered, clicking the "Send Message" button submits the form, making it simple for users to get support or request information related to their final year projects.

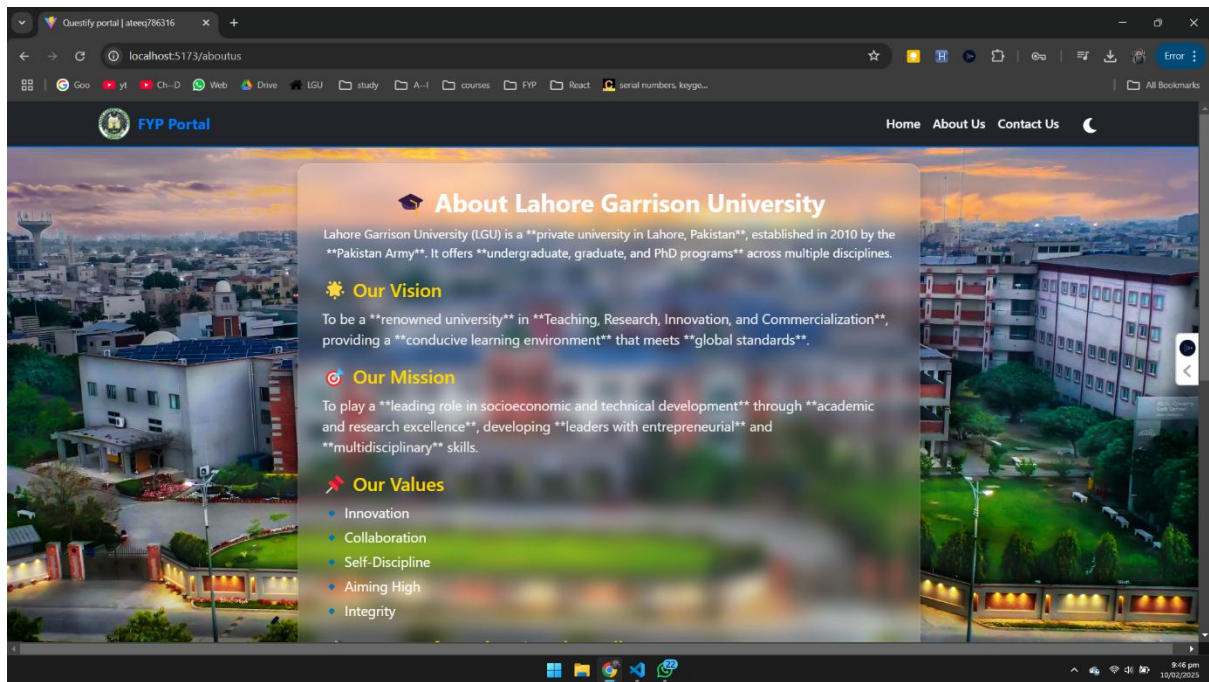

Figure 16:About US

### Description:

The "About Us" page of the Questify FYP Portal introduces the Lahore Garrison University (LGU). It highlights that the portal was created as an LGU initiative to simplify and improve final year projects management. Providing a brief overview of LGU's background, the page focuses on the portal's main goal—helping students successfully complete their FYPs.

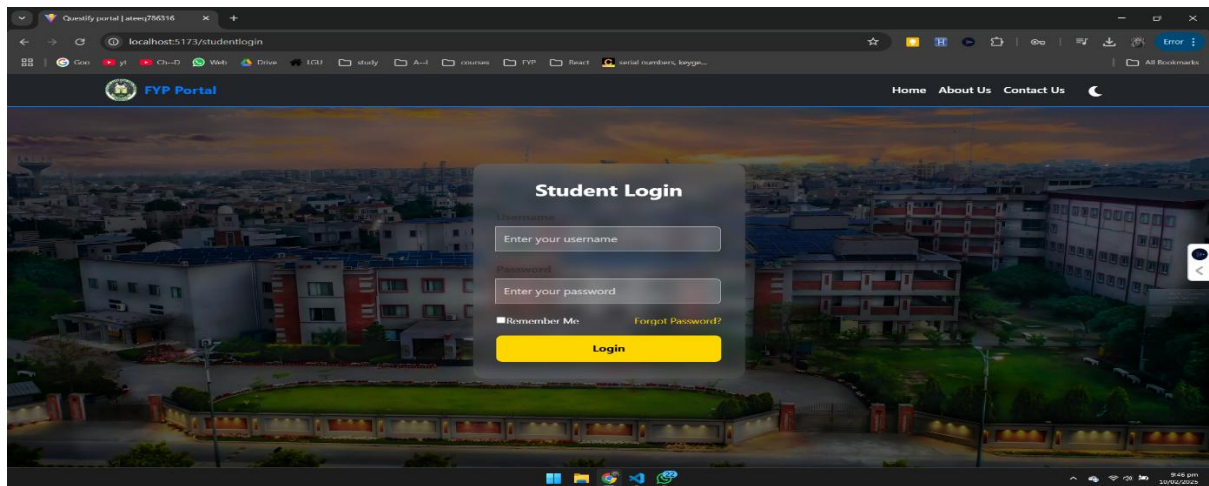

Figure 17: Student Login

**Description:**

The Student Login page of the Questify FYP Portal provides students with secure access to the system. Here, students enter their assigned username and password to log in. Clicking the "Login" button starts the authentication process, and once verified, students authorized to all the portal's features according to their role.

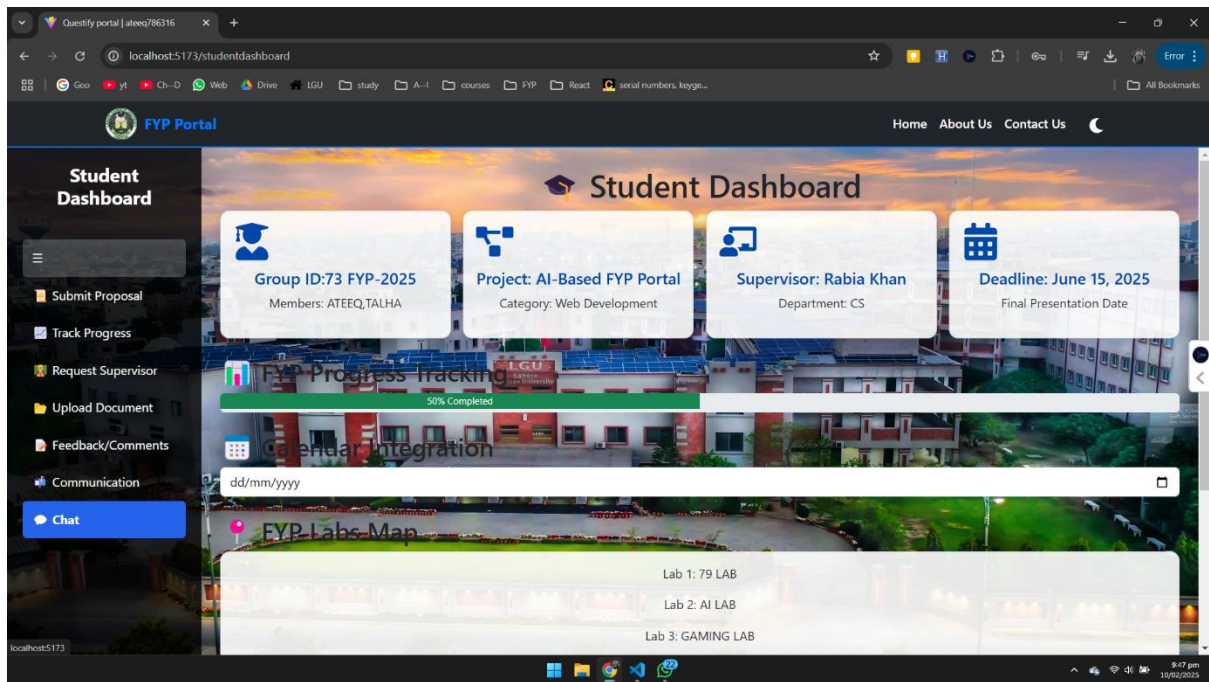

Figure 18: Student Dashboard

### Description:

The Student Dashboard in the Questify FYP Portal is the main page where students can easily manage their final year projects. Once login, students see a clear dashboard which show details of their project, including the Group ID, Project Title, Supervisor's name, and the project Deadline. A sidebar menu allow access to options like Submit Proposal, Track Progress, Request Supervisor, Upload Document, Feedback/Comments, and a Communication section that includes a Chat feature for direct interactions. There's also Calendar, so students keep track of important dates and deadlines. A progress visually shows how's the project progress. The "FYP-Labs Map" highlights available labs—Lab 1: 79 LAB, Lab 2: AI LAB, and Lab 3: GAMING LAB. Altogether, this dashboard is designed to help students stay organized, communicate effectively, and keep their projects on track.

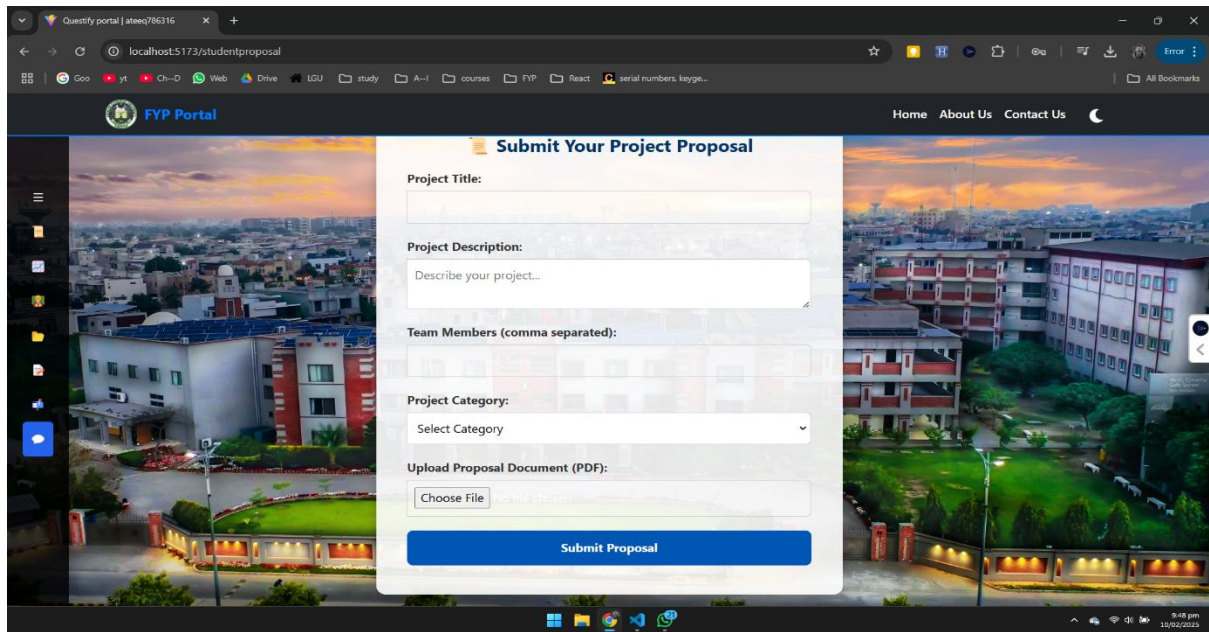

Figure 19: Student submit proposal

### **Description:**

The "Submit Your Project Proposal" page on the Questify FYP Portal gives students a simple way to submit their FYP proposals. Students can fill in their Project Title, write a detailed Project Description, and list their Team Members by separating names with commas. They also select the appropriate Project Category from a dropdown menu to classify their project correctly. To complete the submission, students upload their proposal document in PDF format. Once everything is filled out, clicking the "Submit Proposal" button sends the proposal to the assigned Supervisor for review. This page ensures that all necessary details are collected in one go, making the proposal submission process smooth and efficient.

Figure 20:Student Chatbot

### Description:

The AI Chatbot page on the Questify FYP Portal offers students a convenient way to get instant support and information about their final year projects. "AI Chatbot," this feature lets students type their questions or requests directly into the message box at the bottom of the chat window. The chatbot responds with helpful guidance, answering queries related to project. This interactive tool makes it easier for students to find quick solutions and stay on track with their FYP tasks.
